

MVSystems News

Arvada, Colorado, USA:

MVSystems is pleased to announce the launching of the GMS 1000.

The GMS 1000 is a central hub for managing various gas and facility devices. The input signals from a variety of sensors is received and interpreted by the CPU and pre-programmed actions are carried out.

These responses vary from displaying information on parameter deviations; to selective valve actuation and warning messages; to complete shutdown with visual and audible alarms.
